## Instruction to Authors

Jurnal Manajemen Hutan Tropika is a periodic scientific articles and conceptual thinking of tropical forest management covering all aspects of forest planning, forest policy, forest resources utilization, forest ergonomics, forest ecology, forest inventory, silviculture, and management of regional ecosystems.

Jurnal Manajemen Hutan Tropika receives the script in the form of research results (scientific articles), research notes, book review and conceptual thinking. The manuscript should be written in English.

Authors should mention the submitted type of article and a separated Microsoft Excel file of graphs used in the manuscript, and a covering letter stating concisely the importance of the article. Upon submission, Editor in Chief will assign the manuscript to a corresponding Editor for further handling. The Editor will request at least two scientists to review the manuscript. Based on the comments from the reviewers, the editors will make the decision on the manuscript.

### Submission Charge

Jurnal Manajemen Hutan Tropika does not apply any submission charge.

### Processing Charge

Author whose work is accepted for publication is subjected to pay IDR 1,500,000 per printed article up to 4 pages. Additional page will be charged IDR 250,000 per printed page without color photo(s). Color photo(s) page entirely the responsibility by authors per printed page.

If author(s) cannot pay such fee for a reason, there is opportunity to propose a waiver. We do not want fee to prevent the publication of worthy work. Please send separate email to our editor to request a waiver.

### Submission Preparation Checklist

As part of the submission process, authors are required to check off their submissions' compliance with all of the items available on <http://journal.ipb.ac.id/index.php/jmht/about/submissions>.

### Manuscript Submission

Send the manuscript in a Microsoft Word file through Online Journal System. Registration should be done prior submission. Detail information on registration and submission are available on <http://journal.ipb.ac.id/index.php/jmht/user/register> and <http://journal.ipb.ac.id/index.php/jmht/submission/wizard>.

### Manuscript Format

1. Manuscript should be written following the template available on [http://journal.ipb.ac.id/index.php/jmht/pages/view/submission\\_form](http://journal.ipb.ac.id/index.php/jmht/pages/view/submission_form)
2. We accept major word processing documents. Authors should check their file for computer virus.

### Manuscript sections are written in the following order:

1. Title
2. Author(s) full name
3. Author(s) full address
4. Abstract
5. Keywords
6. Correspondence author data
7. Introduction
8. Methods
9. Results and Discussion
10. Conclusion
11. Recommendation (if necessary)
12. Acknowledgment (if necessary)
13. References
14. Figures and the Figure Titles
15. Table and Table Titles

### Detail Description of Manuscript Sections

**Title** Describing the contents of the principal manuscript are clear and concise way (maximum 11 words).

**Author's data** Author full name (no abbreviation), without a degree and author full address (complete with postcode). *Example:* Bramasto Nugroho, Department of Forest Management, Faculty of Forestry and Environment, IPB University, Academic Ring Road, Campus IPB Dramaga, Bogor, Indonesia 16680. For the correspondence author add the e-mail address, phone, and fax numbers.

**Abstract** Abstract is more or less 200 words words which has no reference and does not contain numbers, abbreviation, acronym or measurement unless essential. Abstract should commence with a clear introduction of 2 or 3 sentences mentioning background of the research. Subsequently, state the general problem of the research. Results are the main findings that directly answer the problem(s) of the research. Give 1 or 2 sentence(s) to discuss the finding(s) or prospective(s). Editor has the right to edit the Abstract for reason of clarity.

**Keywords** Consist of 4–5 phrases, first keyword being the most important (do not use word in the title).

**Correspondence author** Data e-mail, phone, and fax.

**Introduction** Contains theory, research results and latest news or the background of the importance of the research conducted, the formulation of the problem, and research purposes. Write down the background of the research and mention the previous studies that had been done. State one question(s) that are needed to answer through your work. Give a description (local and scientific name) of the studied organism.

**Methods** Describe in brief and concise about the research methods used include the specificity of materials and equipment, sampling (qualifications and chopped), measurement, research design, stages of the workings, parameters, and data analysis.

**Results and Discussion** Presenting the results obtained in brief and can be supported by the illustrations in the form of tables, figures or qualitative descriptions. The discussion is

made with emphasis on cause-effect relationship, the linkage between theory and the results of previous similar studies. The author is expected to dare to assess the advantages and disadvantages of results obtained in a way to compare the results of research with the hypothesis, quality standards, and or the results of previous research or similar through the inclusion and use of primary reference in the discussion. The impact of the research conducted should be outlined at the end of the discussion.

**Conclusion** Describe or give an answer to the problem or research purposes, and not as a summary of research results. Conclusion made a brief, clear, qualitative, general, and is written in 1 paragraph.

**Recommendation** State the possible advice according to the conclusion.

**Acknowledgment** State the grant source (institution, year of the contract) and the person to whom the grant was given. Name the person(s) that help your work and written in a paragraph of 50 words maximum.

**References** References only list the published or accepted material for publication. It should be at least 80% primary references (journal articles). Maximum use of reference derived from the reference published in the last 10 years (expected to have at least one of Jurnal Manajemen Hutan Tropika). Bibliography contains a reference that is used in the manuscript and written in the format surname and year of publication, sorted by next letter writer's name first.

**Jurnal Manajemen Hutan Tropika** follows the name-year citation style. All works included in the reference section should be referred to the text. They should be referred to in the text by the name(s) of the first author and the year of publication in parentheses, using the following format: (Brower & deSalle, 1998) or Brower and deSalle (1998). Use the first author's name and "et al." when there are more than two authors. The order for references within parentheses in the text should be typed start from the oldest year (Monteiro & Pierce, 2001; Morinaka et al., 2002; Rubinoff & Sperling, 2002). If the references have the same year, place them alphabetically. For works by the same author(s) in the same year, append a lowercase a, b, c, etc. to the year of publication. The reference list should follow APA styles:

**Figure** Use graph in maximum width of 15 cm. Numbers and title are written in 10 point Times New Roman font.

**Statistical Graph** Give standard deviation to every mean value. Authors that used Microsoft Excel Program need to give the raw data.

**Photo** Add measurement scale if needed. Arrows should be given to point certain objects.

**Table** Give standard deviation to every mean value. Table titles should be concise. Explanatory material, notes on

measurements, and other general information that applies to the whole table should be included as the first, unnumbered footnote and not in the table title. Numbers and table title are written in 10 point Times New Roman font.

author and are expected to proofread the article carefully. The corrected proof should be received by the administration within 2 working days.

**Proofs**

Proofs will be sent by ojs/e-mail to the correspondence

**Reprints**

Correspondence author will received 5 reprints and 2 prints Jurnal Manajemen Hutan Tropika.

Table 1 Comparison of *nyamplung* (*Calophyllum inophyllum*) seedling growth on the several plant establishment methods

Plant establishment methods	Survival (%)	Seedling height (cm)	Seedling diameter (mm)
Direct seeding	20 ± 5 d	25.86 ± 9.06 c	4.38 ± 1.54 c
Direct seeding using seed pellet	62 ± 5 c	32.77 ± 0.69 b	6.14 ± 2.10 bc
Bareroot seedling	84 ± 4 b	37.38 ± 9.63 b	6.34 ± 1.43 b
Containerized seedling	98 ± 2 a	46.15 ± 5.40 a	7.79 ± 2.62 ab
Blocked media seedling	98 ± 1 a	48.12 ± 7.85 a	9.26 ± 1.11 a
F-test			
Planting method	230.314**	21.823**	7.512**
Block		0.858 <sup>ns</sup>	0.335 <sup>ns</sup>
