GUIDELINES: WRITING ARTICLE "Jurnal Ilmu dan Teknologi Kelautan Tropis"

I. General Provisions

This article is the result of scientific research in tropical marine science and technology and has never been published in other scientific publications. “Jurnal Ilmu dan Teknologi Kelautan Tropis” (JITKT) is used similarity checks to prevent suspected plagiarism. The proposed article can originate from the following areas of tropical marine science and technology: marine biology, marine ecology, oceanographic biology, oceanographic chemistry, oceanographic physics, oceanographic geology, oceanographic dynamics, marine ecology, marine acoustics, ocean sensing, oceanographic systems, oceanographic physics, oceanographic geology, oceanographic dynamics, marine ecology, marine acoustics, ocean sensing, oceanographic systems, oceanographic physics, oceanographic geology, oceanographic dynamics, coral reef ecology, marine acoustics, ocean sensing, geographical information on oceanographic systems, marine microbiology, marine pollution, marine aquaculture, marine fisheries technology, marine biotechnology, air-sea interactions, and marine engineering.

Articles can be written in English or Indonesian and typed in MS-Word, Times New Roman font 12pt font on A4 paper including Figure and Table with top and bottom margins of 3 cm and 2.5 cm left and right with single spacing. Write articles in English, titles are written in English and Indonesian (Italic), abstract (English) followed by keywords, and abstract (Indonesian) followed by keywords. While the article is written in Indonesian, the writing titles are in Indonesian and English (Italic), abstract (English) followed by keywords and abstract (Indonesian) followed by keywords. The new policy which came into force in April 2020 is related to the title and number of writing tables and the information contained therein. Namely, articles written in Indonesian, table views, and picture information on the body of the writing and title in English (italics). Graphics/images use JPEG format with high quality.

The author of the article written in Indonesian follows the General Guidelines for Spelling Indonesian Language, perfected based on the Regulation of the Minister of Education and Culture of the Republic of Indonesia No. 50 of 2015 about General Guidelines for Indonesian Spelling. The writing fraction in the English language newspaper uses a dot, whereas, in the Indonesian newspaper, it uses a comma.

All communication with the publisher is done electronically (E-mail address): jurnalitkt@apps.ipb.ac.id. Article scripts in format and guidelines for writing JITKT, and please send them through the “Open Journal System” (OJS): http://journal.ipb.ac.id/index.php/jurnalikt. All incoming text will receive an acceptance reply. The results of reviews from reviewers (ongoing partners) will also be sent via the OJS and E-mail.

II. Systematics of Article Composition

2.1. Systematics Article Structure Generally Results as Follows:
- Title (as short as possible) and accompanied by an Indonesian / English translation in italics.
- The author's information can be written in the order of the author's name, affiliation, location of the institution (city, postal code, state), and author's E-mail.
III. Writing Technique

3.1. Title

The title is written in capital letters, in bold, in the center (center alignment), Times New Roman 12pt font, black, number of words in the title a maximum of 15 words. Under the title of the manuscript in English includes the translation of the title in Indonesian (italics) and vice versa. Example:

**POTENCY OF CONSORTIUM SYMBIONT MICROBE OF MANGROVE LITTER AS NATURAL PRESERVATIVE FOR TOFU**

**POTENSI BAKTERI KONSORSIUM SIMBION SERASAH MANGROVE SEBAGAI PENGAWET ALAMI MAKANAN TAHU**

3.2. Writer's Name

The author's name is written with a capital letter at the beginning of the name, bold, in the middle, Times New Roman 12pt font, black. It is equipped with affiliation name, institution location (city, postal code, state), and E-mail of the author's correspondent written
Example 1:

**Delianis Pringgenies**, **Amelia Cahya Anggelina**, **Walis Ari Setyati**, & **Ali Djunaedi**
Department of Marine Sciences, Faculty of Fisheries and Marine Sciences, Diponegoro University, Semarang, 50275, Indonesia
*E-mail: pringgenies@yahoo.com*

Example 2:

1Department of Aquaculture, Faculty of Fisheries and Marine Sciences, IPB University, Bogor, 16680, Indonesia
2Master Program of Microbiology, Faculty of Mathematics and Natural sciences, IPB University, Bogor, 16680, Indonesia
3Department of Biology, Faculty of Mathematics and Natural sciences, IPB University, Bogor, 16680, Indonesia
4Department of Resources Management Living Aquatic, Faculty of Fisheries and Marine Sciences, IPB University, Bogor, 16680, Indonesia
*E-mail: yuniha@apps.ipb.ac.id*

3.3. **Abstract and Keywords in English Script**

The words "ABSTRACT" are written in capital letters, centered, bolded, Times New Roman 11pt font, black, paragraph spacing is 1.0. Abstract content is not bolded. Paragraphs are written with "justify" margins, without indentation (the full abstract is a paragraph). "Keywords:" is written in capital letters at the beginning of the word, in bold font, Times New Roman 11pt font, black, marked with a colon, followed by choice of words with a maximum of 8 (eight) words in alphabetical order. Abstract in Indonesian is written in italics. Example:

**ABSTRACT**
Symbiont bacteria from mangrove litter are known to have antimicrobial activity against *Staphylococcus aureus*. However, only a handful of research has been carried out on microbes as an innovative natural material for preserving food, especially tofu…

**Keywords:** bacteria symbiont, consortium microbes, mangrove litter, preservative, tofu

**ABSTRAK**
*Bakteri simbion serasah mangrove diketahui memiliki aktivitas antibakteri terhadap bakteri Staphylococcus aureus. Namun belum banyak dilakukan penelitian terhadap bakteri yang bersimbion dengan serasah mangrove sebagai inovasi bahan alami untuk mengawetkan makanan khususnya tahu…*

*Kata kunci: bakteri simbion, limbah mangrove, mikroba konsorsium, pengawetan, Tahu*
3.4. Abstract and Keywords in Indonesian Script

The words "ABSTRAK" are written in capital letters, centered, bolded, Times New Roman 11pt font, black, paragraph spacing is 1.0. Abstract content is not bolded. Paragraphs are written with "justify" margins, without indentation (the full abstract is a paragraph). "Kata kunci:" is written in capital letters at the beginning of the word, in bold font, Times New Roman 11pt font, black, marked with a colon, followed by choice of words with a maximum of 8 (eight) words written in alphabetical order. Abstract in English is written in italics. Example:

**ABSTRACT**

The availability of shelters in a specific density is expected to increase the production of mud crabs (Scylla serrata) in a recirculation system. Shelter, as one of the abiotic factors, plays a pivotal role in reducing death caused by cannibalism of crab and suppressing the stress levels of biota...

**Keywords:** growth responses, mud crabs, physiological responses, RAS, shelters

**ABSTRAK**

Ketersediaan shelter (tempat perlindungan) pada kepadatan spesifik diharapkan dapat meningkatkan produksi kepiting bakau (Scylla serrata) dalam sistem resirkulasi. Shelter sebagai salah satu faktor abiotik berperan penting dalam mengurangi kematian yang disebabkan oleh kanibalisme kepiting dan menekan tingkat stres biota...

Kata kunci: kepiting bakau, RAS, respons fisiologis, respons pertumbuhan, shelter

3.5. Chapters and Sub-Chapters

This chapter is written in Roman numerals, capital letters, bold, left margin, Times New Roman 12pt font, 1 cm left an indent, and black. While sub-chapters are written in regular numerical order, capital letters at the beginning of words, bold, left margin, 1.25 cm left indent, black. If there are still more sub-sections in the sub-section, then the writing is numbered parallel to the previous sub-chapter followed by a period, a title with a capital letter at the beginning of the word, bold, left side flattened, Times New Roman 12pt font, black. The following example:

I. INTRODUCTION

II. RESEARCH METHODS

2.1. Time and Place of Research
2.2. Material and Data
2.3. Data Analysis

III. RESULTS AND DISCUSSION

3.1. Surface Temperature
3.1.1. Chlorophyll-a Concentration
(Note: subchapter results and discussion can be put together)

IV. CONCLUSION
ACKNOWLEDGMENT

REFERENCES

3.6. Formula
The formula is written in Equation format, Cambria math 12 font, and given a number on the right side and comes with a description of the formula's parts. Example:

\[ SGR = \left( \frac{W_t}{W_0} - 1 \right) \times 100 \] ............................. (1)

Information: \( SGR \) was a specific growth rate (%), \( W_t \) was average body weight in a particular time (g), \( W_0 \) was initial average body weight (g), \( t \) was rearing period (days).

3.7. Figures
The figure can be diagrams, graphs, maps, photos (which convey data), and others. The title of the image is written below the image in capital letters at the beginning of the word, left margin, Times New Roman 12pt font with single spacing. The title of the figure is arranged by sequence number, followed by a point, the indentation distance used is 1.75 cm. Writing The table title uses capital letters at the beginning of the sentence, and the distance used before the table is 1 line. The position of the figure is placed in the center. The new policy is related to writing-figures titles and figures as well as information contained therein; namely, articles written in Indonesian, figures view information on the body of the writing and titles in English (italic). Figures using JPEG format with high quality (Figure 1).

![Crab's shelter](image1.jpg)

Figure 1. Design shelter of mud crab reared in a recirculation aquaculture system.

3.8. Tables
The title of the table is written on the table with capital letters at the beginning of the word, left margin, Times New Roman 12pt font with single spacing. The title of the table is
arranged by sequence number, followed by a point, the indentation distance used is 1.5 cm. The table title is written in capital letters and only written at the beginning of the sentence. The distance of the table title and table is one row. The position of the table in the "justify" margin. The new policy is related to writing-table titles and tables as well as information contained therein, namely, articles are written in Indonesian, table views information on the body of the writing, and titles in English (italic). Example:

Table 1. The value range of physical and chemical parameters of water quality during the cultivation period.

<table>
<thead>
<tr>
<th>Parameters</th>
<th>C</th>
<th>S2</th>
<th>S4</th>
<th>S6</th>

<td>5.35-42.80</td>
<td>10.70-53.50</td>
<td>5.35-42.80</td>
</tr>
</tbody>
</table>

Information: C= control (without shelter), S2= 2 shelters, S4= 4 shelters, S6= 6 shelters.

3.9. Decimal Number Writing

Jurnal Ilmu dan Teknologi Kelautan Tropis adopts the technical and scientific writing system, including decimal numbers following the enhanced spelling by the Regulation of the Ministry of Education and Culture of the Republic of Indonesia No. 50 of 2015 about General Guidelines for Indonesian Spelling.

Abstract or text in English, decimal number writing is written with a dot, for example, the sea surface temperature of 31.26°C. Meanwhile, abstract and text in Indonesian are writing the decimal number followed by a comma, for example, sea surface temperatures of 31,26°C.

3.10. References and Bibliography

Please ensure that every reference cited in the text is listed in the bibliography (and vice versa). We recommend that authors use the reference manager application, such as Mendeley, etc., for easy reference. The format of the next bibliography writing is just to adjust to the JITKT guidelines.

The references used are the last 10 (ten) years of publication (proven by DOI), complete with article information and details. The use of 'Anonymous' as a reference is not permitted. References from news, activity reports, theses and dissertations are also not allowed. Publications from institutions can be used with years, and the completeness.

3.10.1. Write Referrals in Text

Writing references, writing the author's last name followed by a comma, a space and the year the article was published. If the author is two people, use "&" as a conduit for the surname followed by a comma, a space, and a year. For authors of more than two people written using "et al." (Italic). Example:

Boyd (2012) states ... or ..... (Boyd, 2012).
Pedapoli & Ramudu (2014) research ... or ...... (Pedapoli & Ramudu, 2014).
Hastuti et al., (2019) explain .... or ...... (Hastuti et al., 2019).
Sentence …. (Cob et al., 2009a; Cob et al., 2009b).

3.10.2. Writing Bibliography

Articles written in English, bibliography are also written in English. Articles written in Indonesian, bibliography writing adjusted to the article. Writing a bibliography can be arranged as follows: Write the family name followed by commas, spaces, first and/or second names (if any) followed by a dots, spaces, publication years followed by a dots, spaces, scientific article/book titles (capital letters only on the first word) followed by a dots, space, journal name (capital letters at the beginning of each word and use the journal abbreviation name, italics) followed by a comma, space, volume (edition), colon, space, the number of pages of scientific articles followed by a dots. Then complete an active DOI addresses without dots. Some examples of references are presented below:

Example of a Scientific Journal:

Example of Proceeding:

Example of Textbook/E-book:

Examples of Translations:

Example of Institution:

ABSTRACT

Abstracts are written in English, arranged in one paragraph, and no more than 225 words. The abstract contains a short background, objectives, methods, research results, and conclusions that answer the objectives.

Keywords: The number of words chosen is no more than 8 (eight) words (sort by a-z)

ABSTRAK

Abstrak ditulis dalam Bahasa Indonesia pada satu paragraf dan tidak lebih dari 225 kata. Abstrak yang berisi latar belakang, tujuan, metode, hasil penelitian, dan kesimpulan yang menjawab tujuan.

Kata kunci: Jumlah kata yang dipilih tidak lebih dari 8 (delapan) kata (diurutkan a-z)

I. INTRODUCTION

The introduction describes the background of the research to be carried out, coupled with the results of similar studies that have been carried out. It is equipped with reference libraries from institutions and/or articles that have been published. Sentences are written in the form of sequential and informative paragraphs. In the last paragraph, the written sentence contains the purpose of the research, which is the background's conclusion.

II. RESEARCH METHODS

2.1. The Stage is Carried Out in The Research Method

The research method must be written clearly and thoroughly. The sentence explains in detail the procedure both biologically, physically, and chemically, as well as statistically; so that it can be repeated by other researchers. The author must state the product information.
clearly, the website downloaded for the data used, and the commercial/non-commercial equipment used in the study, such as the name of the item, product/equipment/website specifications, and country. The statistical method used is quantitative and is supplemented by the reference method used. Example map of research location and writing the formula:

\[ SR = \frac{N_t}{N_0} \times 100 \]  

Information: \( SR \) was the survival rate (%), \( N_t \) was the total number of surviving crabs at the end of the experiment, and \( N_0 \) was the total number of crabs at the beginning of the experiment.

III. RESULTS AND DISCUSSION

NUMBERING, BOLD, CAPITAL LETTER, LEFT INDENT 1 CM, TNR, 12pt

3.1. The Stage is Carried Out in The Results and Discussion

NUMBERING, BOLD, LEFT INDENT 1.25 cm, TNR, 12pt

Results and discussions can be put together or separated into separate sub-chapters. Research results can be presented in tabular (Table 1) or graph/figure form (Figure 2). The
unit description and level of significance (P <0.05) must be presented to provide complete
information and allow the reader to interpret the results of the experiment. Written sentences
must describe tabular data/images, but numbers must not be repeated widely in the text.
The discussion must be consistent and must interpret the results clearly and concisely,
supported by appropriate literature. The discussion must show the relevance between the
results and the field of investigation and/or hypothesis. Example writing the table:

Table 1. The value range of physical and chemical parameters of water quality during the
cultivation period.

<table>
<thead>
<tr>
<th>Treatments</th>
<th>Glucose (mg/dL)</th>
<th>Cholesterol (mg/dL)</th>
<th>THC (cell/mm)</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Initial</td>
<td>Final</td>
<td>Initial</td>
</tr>
<tr>
<td>C</td>
<td>8.71±2.19a</td>
<td>3.90±0.54a</td>
<td>13.85±4.19a</td>
</tr>
<tr>
<td>S2</td>
<td>5.99±3.19a</td>
<td>1.27±0.86a</td>
<td>9.82±2.88a</td>
</tr>
</tbody>
</table>

Information: Different superscripts following the values in the same treatment indicate
significant differences at a significance level of 5% (DMRT) (P <0.05). C= control (without
shelter), S2= 2 shelters. The values are presented as mean ± standard deviation.

Figure 1. The specific growth rate of mud crab S. serrata during the cultivation period with
shelter addition. C= control (without shelter), S2= 2 shelters, S4= 4 shelters, S6= 6
shelters. The values are presented as mean ± standard deviation. Different letters
above the bars denote significant differences between treatments at a significance
level of 5% (P <0.05).

IV. CONCLUSION

Conclusions should be written briefly in one paragraph, answering the research
objectives and not repeating the study results. The implication can be written by stating what
was found in the study.
ACKNOWLEDGMENT
(ALIGN LEFT, BOLD, CAPITAL LETTER, TNR, 12pt)

Recognition to the person or institution assisting the experiment must be stated.
(Justify, TNR, 12pt, First Life Indent 1.25cm)

CODE OF ETHICS FOR SCIENTIFIC PUBLICATIONS

“Jurnal Ilmu dan Teknologi Kelautan Tropis”

Foreword
The code of ethics of scientific publications in the Jurnal Ilmu dan Teknologi Kelautan Tropis (JITKT) is used to ensure that all the works/writings in this journal have followed ethical principles in academic publications to prevent misunderstandings and conflicts. This document presents several articles on the field of tropical marine science, technology, and guidelines on ethics in this journal publication (authors, editors, best partners, publishers, and readers).

Guidelines on Ethics in Journal Publications
JITKT publishes articles from the scientific research results in tropical marine science and technology and has never been published. The proposed articles can come from the fields of marine biology, marine ecology, oceanographic biology, oceanographic chemistry, oceanographic physics, oceanographic geology, oceanographic dynamics, coral reef ecology, marine acoustics, marine remote sensing, geographic information systems, marine microbiology, marine pollution, marine aquaculture, fisheries product technology, marine biotechnology, integrated coastal management (ICM), air-sea interaction, and ocean engineering.

JITKT is a peer-reviewed journal in the publication of an article in building a coherent and recognized network of knowledge about marine science and technology. Articles sent to JITKT must show the quality of the author's work, research method, and supporting institutions. Therefore, it is essential to set standards in ethical behavior for all parties involved in the publication: authors, editors, sustainable partners, publishers, and journal sponsors.

The Department of Marine Science and Technology, Indonesian Association of Oceanologists, and Indonesian Association of Coastal Management Experts are also responsible for all stages of the publication process. Also, all editorial boards and related parties are committed to ensuring that advertising/promotion, printing, or other commercial income does not impact or influence editorial decisions.

AUTHOR'S ASSIGNMENT

Standard Article
Articles are written original reports from research results and present accurate articles from research conducted by the objectives of the research. The data presented in the article must be accurate based on research results rather than fabrication data. Articles that are published must be adequate and detailed to be used as references or references for other researchers. Articles with inaccurate results reports and data presented not by ethical behavior will not be accepted, and cannot be published in JITKT.

Data Access and Storage
The author may ask to provide raw data relating to editorial needs in the publication process and be prepared to provide data that is readily accessible to the public. If possible, and must be prepared in storing the data by the period after publication.
Originality and Plagiarism
The author must ensure that what has written in the article is the original work. If the author includes the results of the research or references from other articles, the author must include the name of the author of the article quoted. Plagiarism is the act of imitating or copying substantially everything written by other authors without including the original author. This behavior of plagiarism is unethical in the publication and cannot accept in JITKT.

The Same Publication in Other Journals
An author may not publish articles that contain research results and the same substance more than one journal or another publication. Submitting the same article to more than one journal is unethical behavior in the publication and is not acceptable.

Source Recognition
Appropriate recognition of the work/writing of others must always give. The author should include the author's name from the article cited from the published research results (from previous research reports, related service reports, and other related reports). Personally obtained information, whether in conversation, correspondence, or discussions with third parties, does not have to be reported/written explicitly, only written permission from the source.

Article Compilers/authors (Authors or co-authors)
The authors of this article are limited, those who have contributed to the concept of writing, design, implementation, or interpretation of the reported research results. Those who have made significant contributions must register as co-authors. If other people have participated in certain substantive aspects of the research, they must be recognized and registered as contributors. The author must ensure the suitability of the articles with the co-authors before being submitted for publication.

Fundamental Errors in Published Articles
When the author discovers a significant error or inaccuracy in the JITK journal's research, the author should notify the journal editor or editorial board to retract the article and correct it.

EDITORIAL BOARD OF ASSIGNMENTS
Publication Decision
The editorial team of the JITKT is responsible for deciding which articles will publish in JITKT. Sustainable reviewers/partners work closely with the editorial team to decide which articles are eligible for publication in JITKT.

Justice in Publication
Editors and sustainable partners evaluate articles for article science and technology content regardless of race, gender, relatives, religious beliefs, ethnic origin, citizenship, or political philosophy of the author.

Secrets in the Publication Process
The Editor Team and staff editors maintain the author's confidentiality and the writing before publication in JITKT. The editorial team and editorial staff did not give the names and institutions of origin of all authors to sustainable partners in the article review process to ensure that the article will review blinded review paper.
Information Disclosure and Conflict of Interest
The editorial team cannot use articles that enter but are not published in JITKT in their research without the author's written consent. Specific information or ideas obtained through peer review must be kept confidential and not used for personal gain. The editor must resign (i.e., must ask the co-editor, editor's association to review) the consideration of the article that has a conflict of interest due to competition, collaboration, or other relationships with one of the authors, affiliates or institutions. Other appropriate actions must be taken in addressing this, such as revocation of publications.

Engagement and Cooperation in Research
The editor will take responsive steps when there is an ethics complaint in the manuscript published. These steps generally include contacting the author of the article and giving consideration to the complaint in question or complaint made, but also including further communication with relevant agencies and research bodies, repairs to publications, and relevant actions related to the complaint.

DUTIES OF REVIEWERS
Contribution to the Decision of the Editorial Board
Peer-reviews help the editor make decisions to be accepted or rejected by an article that enters JITKT, peer-reviewed (a sustainable partner), to conduct a blinded review or evaluation of relevant articles in their field expertise. Blinded-review means the reviewer team does not know the author's name and the author's institution's name to avoid conflicts of interest and improve its quality.

Each paper is reviewed at least by two reviewers using track change in the article. All comments, suggestions, and reviewers' comments on articles were written in the article using track change to help the editor and writer team communicate the review results. Thus, JITKT does not require any other form to communicate the reviewer's results to the editorial team.

Punctuality
The review process in JITKT generally takes 1-4 months, and if the review process takes longer because of one reason or another, this will be communicated to the author. It is expected that the administrative review process, the improvement of the author, and the publication of the article can be carried out six months.

Confidentiality
Every article received for review must be treated as a confidential document. The article may not be shown or discussed with other parties unless permitted by the editorial board.

The Review Must Be Objective
A review of articles received must be done objectively. Personal criticism of the author is inappropriate and not allowed. The review's results must sharpen the writing, especially in strengthening the results and discussing the research objectives to support the article's improvement.

Source / Reference Recognition
The reviewer should identify relevant research that will be published that there is no plagiarism by the author. Each statement in the discussion must be observed, explored, or the
opinion previously reported must be accompanied and strengthened by the relevant quote. Reviewers must provide an understanding of the editor regarding substantial similarities and overlap with the articles that have been reviewed before the article is published.

**Information Disclosure and Conflict of Interest**

Reviewers may not use material articles that are not published in JITKT in their research without the author's written consent. Specific information or ideas obtained through peer review must be kept confidential and not used for personal gain. Reviewers must consider the article in the review that there is no conflict of interest or there are other relationships with one of the authors, the company, or perhaps the relationship with the institution of the article.

KANDUNGAN KARBON ORGANIK TOTAL DAN FOSFAT PADA SEDIMEN DI PERAIRAN MUARA SUNGAI BANYUASIN, SUMATERA SELATAN (TOTAL ORGANIC CARBON CONTENT AND PHOSPHATE IN SEDIMENTS AT THE BANYUASIN RIVER ESTUARY, SOUTH SUMATERA)
Beta Susanto Barus, Roy Yosua Munthe, & Miko Bernando .......................................................... 395

STRUKTUR GENETIK POPULASI IKAN CAKALANG, Katsuwonus pelamis (Linneaus, 1758) DI PERAIRAN LAUT MALUKU UTARA, INDONESIA (GENETIC STRUCTURE POPULATIONS SKIPJACK, (Katsuwonus pelamis (Linneaus, 1758) IN NORTH MALUKU SEA, INDONESIA)
Nebuchadnezzar Akbar & Rusmawati Labenua .......................................................... 407

KLASIFIKASI HABITAT PERAIRAN DANGKAL BERBASIS OBJEK MENGGUNAKAN CITRA WORLDVIEW-2 DAN SENTINEL 2B DI PERAIRAN KEPULAUAN SERIBU (CLASSIFICATION OF SHALLOW WATER HABITAT BASED ON OBJECT USING WORLDVIEW-2 AND SENTINEL 2B IMAGES IN KEPULAUAN SERIBU WATERS)
Esty Kurniawati, Vincentius Siregar, & I Wayan Nurjaya .......................................................... 421

PENGUKURAN DAN ANALISIS HAMBUR BALIK AKUSTIK MENGGUNAKAN TEKNOLOGI MULTIBEAM ECHOSOUNDER UNTUK KLASIFIKASI SEDIMEN DASAR LAUT TELUK PALU (MEASUREMENT AND ANALYSIS OF ACOUSTIC BACKSCATTER USING MULTIBEAM ECHOSOUNDER TECHNOLOGY FOR SEDIMENT CLASSIFICATION OF THE GULF OF PALU)
Rizqi Ayu Farihah, Henry Munandar Manik, & Gentio Harsono .......................................................... 437

STRUKTUR VERTIKAL DAN VARIABILITAS ARINDO YANG MASUK KE TEPI BARAT LAUT BANDA (VERTICAL STRUCTURE AND VARIABILITY OF INDONESIAN THROUGHFLOW (ITF) IN TO WESTERN BANDA SEA)
La Ode M. Gunawan Giu, Agus S. Atmadipoera, Yuli Naulita, & Dwiyoga Nugroho .......................................................... 455
# TABLE OF CONTENTS

**LAJU AKUMULASI SEDIMEN MANGROVE DI TANJUNG BATU, KEPULAUAN DERAWAN KALIMANTAN TIMUR**
*(MANGROVE SEDIMENT ACUMULATION RATE IN TANJUNG BATU, KEPULAUAN DERAWAN, EAST BORNEO)*
Intan Sari Dewi, Tri Prartono, Ali Arman, & Alan F. Koropitan ........................................ 327

**DETEKSI SEBARAN MUATAN PADATAN TERSUSPENSI DENGAN MODEL EMPIRIS DAN MODEL SEMI-ANALITIK DI PERAIRAN BEKASI**
*(DETECTION OF TOTAL SUSPENDED SOLIDS DISTRIBUTION USING EMPIRICAL AND SEMI-ANALYTICAL MODELS IN BEKASI)*
Pingkan Mayestika Afgatiani, Maryani Hartuti, & Syarif Budhiman ........................................ 341

**PEMODELAN SEBARAN SEDIMEN TERSUSPENSI DAMPAK PENAMBANGAN TIMAH DI PERAIRAN BANGKA**
*(THE MODELING OF SUSPENDED SEDIMENT DISTRIBUTION DUE TO TIN MINING IN BANGKA SEAS)*
Aditya Pamungkas & Semeidi Husrin .............................................................. 353

**STRATEGI PENINGKATAN EFEKTIVITAS PENGELOLAAN KAWASAN KONSERVASI TAMAN NASIONAL KARIMUNJAWA**
*(STRATEGY FOR IMPROVING THE EFFECTIVENESS OF MANAGEMENT IN THE KARIMUNJAWA NATIONAL PARK CONSERVATION AREA)*
Artika Nanda Magfiroh, Zairion, & Achmad Fahrudin .................................................. 367

**STUDI KINETIKA ADSORPSI DAN DESORPSI ION FOSFAT (PO₄²⁻) DI SEDIMEN PERAIRAN SEMARANG DAN JEPARA**
*(KINETIC STUDY ON ADSORPTION AND DE SorPTION PHOSPHAT ION (PO₄²⁻) IN SEDIMENT SEMARANG DAN JEPARA)*
Lilik Maslukah, Muhammad Zainuri, Anindya Wirasatriya, & Rikha Widiaratih .................................................. 383
